Credit Impaired Loans

If you have experienced financial problems in the past, we can help you **re-build your credit rating**.

Non-conforming lending was set up specifically to cater for clients that normal lenders would not look to lend to due to, past credit problems that have now been fixed, or for borrowers with current credit problems.

At bhome.com.au, we have access to a number of non-conforming lenders who offer a variety of loan products to deal with issues like yours.

Non-conforming home loans are in most cases no different to other home loans in the variety of choices that are available such as variable, fixed and split rate loans, line of credit and other features such as redraw facilities and mortgage offset.

Because the borrowers are regarded as slightly higher risk, most lenders charge a higher interest rate (generally 1 to 2% higher) and charge higher fees than for traditional loans.

Please complete our [online application](#) as possible and we will respond within 24 hours.

For information required to refinance and consolidate your loan please see our [Loan Information Guidelines](#) page.
